

Reliability you can trust.

Monitor your Costs

With today's costs it's a necessity to know how much you're spending in the field. From seed costs to man-hours, the Area Plus will help keep track of vital information. Using the Area counters, you can easily measure how much seed, fertilizer and fuel you are consuming per acre. The distance and time functions, enables you to measure the efficiency of your operation.

Don't Estimate. Calculate.

Eliminate the guesswork with the Area Plus. This versatile monitor uses a magnetic wheel sensor to give you accurate measurements up to one tenth of an acre. Whether you need to measure area, distance, speed, or even time spent, the 6 Function Area Plus can give you the precise readout you are looking for.

From your sprayer to your ATV, the Area Plus is versatile enough that it can be applied to almost any piece of equipment. For your benefit, there are 2 area counters so you can keep track of short and long-term coverage. Some farmers use one counter to track field acres and the other counter to track total acres. Other features include distance and speed displays with pinpoint accuracy that will increase your efficiency. The Area Plus is

reliable and easy to use; it's an inexpensive way to track your progress without the headache.

Committed to Excellence...

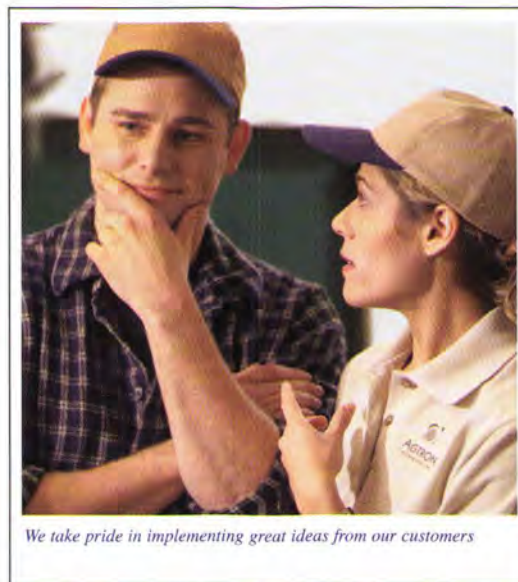

When you buy an Agtron monitor, you don't just get another piece of equipment. You also get a service department that is committed to making your farming operation more efficient and profitable.

We make sure each customer receives incredible service. We have built our company one customer at a time and we continue to impress farmers with our care and attention to their individual needs.

Technology doesn't need to be difficult. We take extra care in making our monitors easy to understand and use; our manuals are written in a language that everyone can understand. Our service representatives are only a toll free call away and we constantly update our website

with your frequently asked questions.

Agtron listens to you, our customers. Your suggestions drive our research and development initiatives. Together we create better products for more efficient and profitable farming.

We take pride in implementing great ideas from our customers

AREA PLUS

6 Function Area Monitor

Area Plus Features

- Two independent area counters that can be reset separately
- Run/Hold switch- you decide when to record acre accumulation
- Digital display – Accurate to the tenth
- Distance counter
- Hour meter measures elapsed time to help with scheduling and billing
- All calibration values and area/distance counters are saved and unaffected by power loss
- Sturdy and easy mountable design with heavy duty velcro
- Customizable software
- Standard or metric units can be selected
- Lighted display and buttons
- Self calibration feature allows monitor to be set accurately with no mathematics
- With special calibrations other quantities such as bushels can be measured
- More than just an acre counter, the Area Plus has digital revolution monitoring incorporated. This is great for monitoring air seeder fan and engine RPM
- 5.5" by 3.5" x 1.1" thick monitor head
- Exact ground speed function of the Area Plus eliminates the approximation that is typical of analog speedometers

Options

- Bracket mounting system for display
- Run/hold work switch sensor
- Run/hold relay kit
- RPM Sensor to measure high speed rotations
